

Nice Méridia: Urban science park

A priority project in the Eco-Valley, the Nice Méridia Urban Science Park will extend over 200 hectares, with an initial operational section of 24 hectares.

Its urban location along with the varied programme, will make it a **unique eco-district**, providing a high quality of life and an unrivalled working environment. As a true catalyst for innovation, Nice Méridia will provide a **development area for R&D and training in sectors such as green growth, environment and health.**

Objectives:

- ▶ Create a new mixed use urban district that combines business, shops, housing and universities, specifically focused on R&D organisations
- ▶ Strengthen the Eco-Valley's priority sectors related to urban innovation
- ▶ Accelerate existing development tools (business incubators, etc.).
