

The Smart City Innovation Centre

The **Smart City Innovation Centre** is a **collaborative research platform that is** unique in France. Focused on innovation, Smart cities and economic development, the centre is based in the heart of the Mediterranean Institute of Risk, Environment and Sustainable Development (IMREDD).

Its role is to **foster the emergence of the Smart**, sustainable and interconnected city.

SMART INNOVATION CENTER

Design centre which presents the Smart City, its applications and how it can improve everyday life in the city.

Warehouse to
> collect data from several sources,
> make this data interoperable
> use this data to develop new services,
> develop the concept of real time event prediction).

Site for project teams to work together on the same platform and access the data from the digital data warehouse.

Key figures

A show-room over 300 square metres

An (openspace) smart lab
In the Nice Premium building

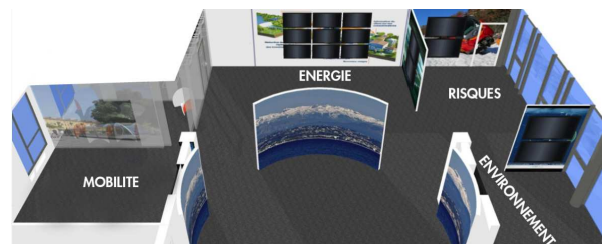

An urban hypervisor,
A warehouse for urban digital data, datacentre and smart software

300

sensors under deployment over the 162 hectares of the Eco Valley as part of the 'Urban Environmental Monitoring project', the largest French prototype of its kind

Schedule

- Project launched in **2015**
